

Yitzhak Binyamin

Full Stack Developer | React & Node.js | Java Frontend (3 yrs)

Yitzhakbin9@gmail.com | 052-585-8770 | Rishon Lezion | [GitHub](#) | [LinkedIn](#)

Summary

Frontend Developer with 3 years of professional experience building enterprise-grade systems at Bank Hapoalim using Java and Swing. Complemented by hands-on full stack development in personal projects using React, Node.js, MongoDB, and Firebase. Strong foundation in OOP, REST APIs, and agile workflows. B.Sc. in Computer Science.

Experience

Frontend Developer — Bank Hapoalim | 2022 – 2025

Java · Swing · Mainframe · Microservices · Agile · Jira

- Led phased migration of frontend integrations across core internal banking screens, replacing legacy Mainframe calls with Java microservices while preserving UI and workflows.
 - Reverse-engineered complex, undocumented legacy integrations to ensure full functional parity during modernization.
 - Refactored client-side service layer to support RESTful microservices via incremental rollout, minimizing operational risk.
 - Collaborated in cross-functional agile teams on design, development, and deployment of scalable enterprise solutions.
-

Projects

Full Stack E-Commerce Web App | React · Redux · Firebase · Firestore

(demo admin credentials: username: yitzhakbin99@gmail.com, password: 123456)

- Built full stack e-commerce app supporting Admin and Customer roles, with dynamic product catalog, shopping cart, and order flow.
- Integrated Firebase Authentication and Firestore for role-based access control and data persistence.
- Implemented sales dashboards and data-driven UI components with client-side state management via Redux.

Factory Management System | Node.js · Express · MongoDB · JWT

(demo credentials: username: admin, mail: admin@gmail.com)

- Designed and implemented a RESTful API with routers, controllers, and data access layers.
 - Implemented JWT-based authentication and authorization with role-based access and per-user daily limits.
 - Modeled complex relationships for employees, departments, shifts, and users with validation and logging.
-

Technical Skills

Frontend: React, Redux, TypeScript, JavaScript, HTML, CSS

Backend: Node.js, Express, Java, REST APIs, JWT

Databases: MongoDB, Firebase, MySQL, SQL

Tools & DevOps: Git, GitHub, Docker, Jenkins, CI/CD, Jira, Confluence, Agile

Other: OOP, Algorithms, Data Structures, MVC

Education & Training

Full Stack Development Program — Yaniv Arad Tech Training Labs | 2025

React, Redux, Node.js, Express, REST APIs, JWT, MongoDB, Firebase — end-to-end practical projects.

Java & Spring Backend Bootcamp | 2022

Java, Spring, REST APIs, SQL & MongoDB, production-oriented development.

B.Sc. Computer Science & Mathematics — Ariel University | 2016 – 2020

Military Service: Sergeant First Class, Combat Unit 'Nahal', IDF | 2010 – 2013

Languages: Hebrew — Native | English — Full Professional Proficiency
